SUMMARY

As a software developer, I am a highly motivated individual who actively seeks out new challenges and opportunities for professional growth. With a strong dedication to my work, I consistently strive for excellence in every project I undertake. I possess a deep passion for learning and staying up-to-date with the latest industry trends and technologies.
This drive allows me to adapt quickly to new environments and tackle complex problems with confidence. I am committed to delivering high-quality solutions that meet the needs of clients and users alike.

WORK EXPERIENCE

Full Stack Developer, Pabau Clinic Software, Prishtina — Jul 2022 - November 2023

- **Responsive Design Leadership**: Spearheaded the implementation of responsive design to optimize user experience across various devices, enhancing both accessibility and user engagement.
- **End-to-End Feature Development**: Leveraged React, Next.js, TypeScript, and GraphQL to architect scalable frontend components, while also contributing to backend development with Nest.js, Prisma, and PostgreSQL, ensuring cohesive, end-to-end solutions.
- **GraphQL Integration**: Developed GraphQL queries to efficiently fetch data and integrate seamlessly into frontend components, providing a smooth and responsive user experience.
- **GraphQL Mutations**: Designed and implemented GraphQL mutations to manipulate data efficiently, ensuring real-time updates and smooth interactions within the application.
- **Bug Identification and Fixing**: Proactively identified and resolved bugs, ensuring system stability and enhancing user experience across all functionalities.
- **Database Management**: Created new tables using SQL and integrated them with Hasura, optimizing the backend architecture and ensuring smooth data flow between frontend and database.

Front End Developer, International Advisory, Products and Systems , Prishtina — November 2023- Present

- **React.js Component Architecture**: Developing and maintaining scalable, reusable component architectures in React.js to streamline development and improve code organization.
- **State Management**: Implementing efficient state management using Redux, Context API, to ensure seamless data flow across components and reduce complexity.
- **Responsive and Adaptive Design**: Building layouts that are responsive and adaptive across different devices using CSS3, Flexbox, Grid, and media queries to enhance user accessibility and experience.
- **API Integration**: Fetching and manipulating data from RESTful APIs, handling asynchronous calls, and managing data flow within the application.
- **Code Reviews and Mentorship:** Conducting code reviews and providing constructive feedback to improve code quality and support team development

EDUCATION

Bachelor of Engineering Informatics — **October 2018 - June 2021**
University of Mitrovica

Natural Science — **September 2015 - June 2018**
Gymnasium "Eqrem Qabej"

SKILLS

- **HTML**
- **CSS**
- **Javascript**
- **ReactJS**
- **NextJS**
- **TypeScript**
- **GraphQL**
- **REST API**
- **Prisma**
- **Git**
- **Research/StackOverfow/ChatGPT**
- **Communication**
- **Problem Solving**

COURSES

- **The Complete Javascript Course 2022: From Zero To Expert, Udemy**
- **React - The Complete Guide(Incl Hooks, React Router, Redux), Udemy**
- **NextJs & React - The Complete Guide(Incl. Two Paths!), Udemy**

LANGUAGES

- **Albanian**: Native or Bilingual Proficiency
- **English**: Professional Working Proficiency
